Follow these four simple steps to measure your feet correctly:

1. All you need to measure your feet from heel to toe is a sheet of paper, a pencil, and a ruler.
2. Place the paper on the floor against a wall. Place your heel against the wall.
3. Mark the tip of your longest toe on the paper. Repeat the procedure with the other foot.
4. Measure both lengths and compare them with the size chart. Let the longer foot determine your shoe size.

If you are comparing shoe sizes and find that your foot length falls between two sizes, we recommend choosing the larger size.
